DETAILED ACTION

1. This Office Action is in response to the Amendment/Remarks submitted 09 October 2007
2. Claims 1-20 have been presented for examination.

Response to Arguments

3. In view of Applicant's amendment, the 35 U.S.C. 101 and 112 rejections of claims 1-20 are withdrawn.

Allowable Subject Matter

4. Claims 1-20 are allowed.
5. The following is an Examiner's statement of Reasons for Allowance:

Regarding claim 1:

The prior art of record does not teach "an automatic selection process controlled by the processor that selects a macromodel from the set of macromodels to simulate one or more of the electrical transmission lines, the selection of the macromodel being determined by one of 1) comparing a total distortion to an error threshold and 2) comparing a length of the transmission line to a critical length calculated from the parameters". Examiner notes that the term is interpreted in light of the specification to be a part of a general computing system or a CAD system.

Regarding claim 13:

The prior art of record does not teach "automatically selecting a macromodel based upon whether the total distortion is more or less than the error threshold."

Regarding claim 17:

The prior art of record does not teach "automatically selecting a macromodel based upon whether the total length is more or less than the critical length."
